

Motivation - to learn about the Tanzania food system, including prevalence of inadequate micronutrients in the diet

knowledge sharing

Support this to its reality including

Produce a collaborative, high quality piece of research that is useful for nutrition policy community in Tanzania

Motivated to learn such kind of research much needed in Tz and all LMIC on generating pieces of evidence for policymaking

Motivated to learn something new: the application of R

More skills to mentees and A Manuscript

Being part of Deriving evidence for informing nutrition programming in Tanzania

Liberty Motivation - I believe that the best way to learn anything is by attempting to explain it to others, this is my motivation for sharing my R knowledge in this training

To get new knowledge

Rie - great opportunity to communicate with helpful colleagues in MAPS team! you can enjoy A LOT!

Expand the MAPS community to Tanzania

Chris--  
Learn  
Sahwili

Advance  
R and  
GitHub  
skills

To be able to analyze HCES data using R software and generate manuscript for submission to reputable journal

motivated to become conversant with R see the results what is telling about Tanzania

Ahsante sana- Thank you very much, Karibu-Welcome, Hakuna matata- no problem, Chakula-Food, Poa-cool, kwaheri - Bye, Mambo-Hi/ Hello
